Servicing the Research Triangle!

BENEFITS

Central Smart Control

- The Drop Hub connects and manages all your Drop devices for full-home protection and automation.

App + Remote Access

- Monitor water usage, get instant alerts, and adjust settings right from your phone or with the Drop Remote's one-touch control.

Automatic Protection

- Detects leaks, pressure loss, or freezing temperatures and can shut off water instantly to prevent damage.

Reliable Power & Connectivity

- Stays online with backup power and wireless communication across your home.

Easy Monitoring Anywhere

- The Drop Remote provides quick visual status updates and control from any room – no wiring required.

Whole-Home Peace of Mind

- Together, the Hub and Remote deliver total control, awareness, and protection for your water system 24/7.
