Servicing the Research Triangle!

BENEFITS

- **Reliable Protection:** Real-time UV performance feedback with advanced sensor technology.
- **Consistent Output:** Stable UV lamp performance — even during power fluctuations.
- **Low Maintenance:** Digital display with countdown timer and lamp replacement reminder.
- **Compact Design:** High-output UV technology in a smaller, space-saving footprint.
- **Built to Last:** Long-life UV lamp provides up to 9,000 hours of dependable performance.
- **Optional Safety:** Add a solenoid valve to automatically stop water flow if UV levels drop.
- **Versatile Use:** Perfect for whole-home or point-of-entry water systems in houses, cottages, and custom builds.
